Introduction

Main text should be started from a new page after the Title and Abstract page. Leave three paragraphs line blank.

We prefer authors to use Word processor, Times New Roman, 12 pt at the main text. They also should follow the heading and some other writing formats mentioned following to make easier responsibilities of the Journal layout editors and proofreaders.

Heading 1 – Main Heading Level (in Front Page)

Heading 2 – subheading

Heading 3 – subheading

Heading 4- subheading.

Normal – all paragraph text that doesn't include abstract, quotation, headings or references.

Quotation – quotes that are longer than three lines or 40 words should appear as a separate indented paragraph.

Tables- Tables should be placed in text exactly where it should be in the published paper.

Figures/Graphics. Figures/graphics should be formatted as camera ready document type such as jpg, gif etc.

tables and referencing rather than content. There may be some non standard samples regarding the requirement of the text or page limitations. In case this kind of requirement do not hesitate to inform the editor.

Conclusions

It is expected from authors to try separating their judgement, research conclusions or consequences under a separate title such as results, conclusions, last words whatever they choose.

Acknowledgement

Authors can share their acknowledgements in this part of the manuscript.

References

The reference list at the end of the paper should be formatted using the 'references' style, which provides a hanging indent. Remember to include a 6 point gap before the first reference (after the heading) under the Format menu in the Paragraph commands. Also, follow the 6 point gap rule between the references.

Authors may follow the APA Publication Manual (6th or later editions) to write references.
